Dear Mr./Ms. lastname

I am Ruan Hartman, a 21 year old 2nd year computer and information science student at the IIE's MSA. I came across the advertisement on blank and I am excited to be applying for the blank position. I understand you are in need of a motivated and hard working individual with a strong knowledge of coding and web design and I see myself as a good fit. I admire the approach your company has shown to the technology industry and I have long awaited an opportunity to share my passion and unique outlook with new areas of work.

As a high school rugby player I am well acquainted with team work and I thrive under pressure. I studied a year of mechanical engineering before changing to an IT degree, this shows my ability to adapt to change and thrive in new environments. I am well versed in many coding languages including Java, C and C# to name a few. I believe that bringing me onto your team will be adding a strong member as well as allowing me the opportunity to grow and expand my knowledge with the help en expertise of your current employees. Attached you will find my CV which will go into further detail regarding my experience and accomplishments.

Finding new ways to grow and learn is one of my top priorities and I feel this position affords me that whilst allowing me to put my knowledge to use. I look forward to hearing from you

Regards,

Ruan
